Contact

Intelligence Built for Reality.

PYXONconnectsAI, IoT, cybersecurity, and cloud-native DevOps modernizationinto one secure fabric that powers buildings, fleets, and public services across theMEAregion.

A regional technology partner headquartered in Riyadh, helping governments and enterprises across the MEA region turn complex infrastructure into intelligent, connected systems. We bring together AI, IoT, cybersecurity, and cloud-native modernization to power real operations in buildings, fleets, and public services. Our focus is on clear business outcomes – efficiency, safety, and growth – not technology for its own sake.

Years Experience

Strategy to Operations

PYXONis the partner turning AI, IoT, and cloud into real competitive advantage – not just concepts..

Integrated AI, IoT, cybersecurity, and cloud-native services that turn complex operations into connected, intelligent systems—helping organizations modernize securely, boost efficiency, and unlock new opportunities for growth.

From AI consulting to machine learning and predictive analytics — we turn your data into actionable insights and automated workflows.

Smart buildings, energy management, healthcare tracking, and logistics — we connect devices, systems, and people on one secure platform.

AI-driven cybersecurity platform with unified threat detection, compliance automation, and real-time risk monitoring.

End-to-end Microsoft Dynamics 365, Power Platform, and RPA solutions that modernize your operations and reduce costs by up to 70%.

Industry-focused expertise turning complex operations into intelligent, connected systems across the MEA region.

Secure digital services and smarter citizen experiences

Data-driven classrooms and safer school journeys

Real-time visibility for patients, staff, and critical assets

Predictive operations with less downtime and higher output

Energy-optimized, responsive, and sustainable facilities

Connected fleets, optimized routes, and safer journeys

Compliant, intelligent, always-on digital operations

Helping organizations operate smarter, safer, and at scale across the MEA region.

A culture of curiosity, ownership, and impact — where engineers, architects, and problem-solvers work on real AI, IoT, and cyber challenges across the MEA region.

Revolutionizing AI for the Arabic Language

Why Pyxon AI Stands Out

Enterprise-Grade Arabic AI Solutions

Innovation at the Core

LLM Security Agent

LLM Distillation for Edge Devices

Modular RAG System

Enterprise-Grade AI Modules

Pyxon AI Search

Key Features:

Pyxon AI Connect

Pyxon AI Spider

Pyxon AI Agent

Pyxon AI Generative

Pyxon AI Program

Enterprise-Grade Security

100% Data Privacy

Compliance Ready

Offline Capabilities

Why Choose Pyxon AI?

Solutions

Contact

Secure, private, and purpose-built solutions with offline AI processing. Data never leaves your premises - complete control, compliance, and data sovereignty. Enterprise-grade Arabic AI solutions combining 100% data privacy, Arabic-first design, security-first architecture, and cutting-edge LLM research.

Industry-leading metrics that demonstrate our commitment to excellence

We combine cutting-edge technology with deep understanding of Arabic language nuances to deliver solutions that truly work for your enterprise.

Three cutting-edge research modules driving innovation in AI technology

Comprehensive security testing framework for Large Language Models

Lightweight, efficient LLM models for edge computing

Advanced RAG with specialized modules for flexible information retrieval. Key insight: LLMs are strong context generators - sometimes generating context is more effective than retrieving.

Six powerful modules designed to transform your enterprise operations

Semantic discovery for regulated knowledge

Deliver legal-grade answers across Arabic and bilingual corpora with domain-tuned embeddings, dialect awareness, and bilingual summaries.

LLM-assisted data transformation into reporting

Transform multilingual source data into curated warehouses and executive summaries using schema intelligence, governance guardrails, and quantised inference.

Continuous web intelligence with policy-aware crawling

Monitor regulatory, media, and research sources via adaptive crawlers with relevancy grading, toxicity filters, and freshness scoring.

Agentic automation for enterprise workflows

Coordinate tools, APIs, and teams through approval-aware agents that deliver service experiences with human oversight.

Content studio with orchestrated quality control

Produce marketing, communications, and learning assets in Modern Standard Arabic and regional dialects with model benchmarking and human feedback loops.

AI enablement for builders and teams

Deliver bilingual bootcamps, sandbox projects, and certifications that upskill teams to launch Pyxon AI solutions responsibly.

Your sensitive data stays on-premises with full compliance to regional regulations, complete audit trail, and zero cloud dependency risk.

Complete data sovereignty

Azure AD SSO, RBAC

ISO, GDPR, audit-compliant

No internet dependency

The Only Arabic AI Platform with:

A culture of curiosity, ownership, and impact — where engineers, architects, and problem-solvers work on real AI, IoT, and cyber challenges across the MEA region.

- Arabic Natural Language Processing
- Machine Learning & AI Architecture
- Secure Offline Processing
- Enterprise Integration (Microsoft Dynamics 365, Power Platform, Azure)
- Prompt Injection Testing - Detects and prevents attacks
- Token Draining Detection - Identifies consumption attacks
- Adversarial Testing - Systematic vulnerability evaluation
- Security Hardening - Automated fixes and recommendations
- Model Compression - 80% size reduction, 95%+ performance
- CPU Optimization - Resource-constrained environments
- Mobile Deployment - On-device Arabic AI processing
- Custom Device Support - Tailored architectures
- Search Module - Adaptive database search
- RAG-Fusion - Multi-query expansion
- Memory Module - Context-aware memory
- Routing Module - Multi-source navigation
- Predict Module - LLM-generated context
- Task Adapter - Specialized retrievers
- Dialect-aware indexing with normalization
- Hybrid dense + sparse retrieval with citations
- Role-based analytics and usage monitoring
- Automated schema mapping with approvals
- Cost-efficient quantised LLM pipelines
- Audit-ready lineage and bilingual exports
- Right-to-left aware crawling
- LLM-based relevance and safety scoring
- Vector updates for RAG pipelines
- No-code mission builder with guardrails
- Knowledge grounding via shared embeddings
- Observability dashboards (SLA, latency, handoffs)
- Automatic routing across LLMs
- Tone, dialect, and compliance presets
- Evaluation harness with Arabic metrics
- Hands-on labs (RAG, agent design, governance)
- Mentor-led reviews and security clinics

- Certification tracks for AI professionals
 - Arabic Expertise - Native support, RTL design
 - Security-First - Enterprise-grade, offline capable
 - Innovation - Cutting-edge LLM research
 - Privacy - Complete data sovereignty
 - Enterprise Ready - Microsoft partnerships
 - 24/7 Support - AI assistant + human team
 - Proven Track Record - Trusted by leading organizations
 - 100% offline processing
 - 95% Arabic accuracy
 - AI Innovation
 - IoT and Smart Solutions
 - AI-driven Cybersecurity
 - Cloud DevOps and Modernization
 - Aseel Center, Northern Ring Rd, Al Izdihar, Riyadh, 13225, Saudi Arabia

PYXON's Smart Solutions empower organizations to operate with greater intelligence, efficiency, and control. By combining IoT technologies, real-time data insights, automation, and advanced connectivity, we create integrated systems that streamline operations and unlock new levels of performance.

Key metrics that demonstrate our IoT platform performance

Our solutions modernize how buildings, assets, and infrastructure behave—transforming them into responsive, data-driven environments. From smart energy management and intelligent transportation to connected workflows and automated monitoring.

Multi-protocol device integration

Instant insights from sensor data

Connect with existing systems

End-to-end data protection

Designed to adapt and scale, our Smart Solutions provide organizations with the tools they need to make faster decisions, improve operational visibility, and build a smarter future.

Intelligent fleet management and traffic optimization systems

End-to-end supply chain visibility and warehouse automation

Connected healthcare systems for patient monitoring and asset tracking

Smart manufacturing and industrial IoT for operational excellence

Smart campus and connected learning environments

Connected systems for emergency response and public security

Unified IoT platform for seamless device and data management

Intelligent automation for smart buildings and infrastructure

PYXON delivers technology that enhances productivity, reduces costs, and supports sustainable growth.

A culture of curiosity, ownership, and impact — where engineers, architects, and problem-solvers work on real AI, IoT, and cyber challenges across the MEA region.

Secure Your Digital Future

Solutions

Contact

At PYXON, our Cybersecurity Solutions provide end-to-end protection for your digital ecosystem, ensuring that your data, infrastructure, and operations remain secure in an increasingly complex threat landscape. We combine advanced security technologies with deep industry expertise to deliver intelligent, proactive, and scalable defenses tailored to your organization's needs.

Industry-leading security metrics that protect your organization

From threat detection and incident response to identity management, network protection, and compliance readiness, our approach focuses on preventing risks before they occur—while enabling your teams to operate with confidence and agility. Powered by continuous monitoring, AI-driven analytics, and best-in-class security practices.

Complete security coverage

24/7 threat surveillance

Prevent before occur

Complete data protection

With PYXON, cybersecurity becomes a strategic enabler—strengthening resilience, reducing vulnerabilities, and ensuring your business can thrive securely in the digital future.

Intelligent threat detection using advanced machine learning and behavioral analytics

Next-generation AI-powered firewall with adaptive protection capabilities

Automated compliance monitoring and reporting for regulatory requirements

Proactive threat intelligence and vulnerability prediction

Self-healing security systems with automated response capabilities

Integrated security ecosystem with shared threat intelligence

Comprehensive security architecture with centralized management

Never trust, always verify - comprehensive zero trust implementation

PYXON safeguards what matters most—strengthening resilience and ensuring your business thrives securely.

A culture of curiosity, ownership, and impact — where engineers, architects, and problem-solvers work on real AI, IoT, and cyber challenges across the MEA region.

Contact

PYXON helps organizations redesign the way work gets done. By combining cloud modernization, Robotic Process Automation (RPA), Microsoft Dynamics 365 ERP, and the Power Platform, we build a digital workforce that handles repetitive tasks while your teams focus on higher-value work.

Measurable results from our cloud modernization and automation solutions

Our approach combines advanced cloud technologies, intelligent automation, and industry best practices to ensure seamless transitions with minimal disruption. Whether you are refactoring existing applications, adopting microservices, integrating DevOps pipelines, or deploying multi-cloud environments, PYXON delivers end-to-end solutions tailored to your strategic goals.

Faster time to market

Modern DevOps practices

Streamlined operations

Built-in compliance

With modern, cloud-powered systems, organizations gain improved reliability, reduced operational costs, enhanced user experiences, and the agility needed to innovate quickly in today's fast-changing digital landscape.

Comprehensive cloud readiness evaluation and strategic roadmap development

Seamless workload migration with minimal disruption to operations

Scalable, reliable, and cost-optimized cloud infrastructure design

Accelerate delivery with modern DevOps practices and toolchains

Container orchestration with Kubernetes and Docker for portable applications

Enterprise-grade security and regulatory compliance for cloud environments

Transform legacy applications into modern, cloud-native solutions

Build modern applications designed for cloud scalability and resilience

We build a digital workforce that takes care of repetitive, data-heavy tasks while your teams focus on higher-value work. The result: faster processes, fewer errors, and a more resilient digital enterprise.

Design and implementation of RPA solutions across finance, HR, operations, customer service, and supply chain

End-to-end implementation and rollout of Microsoft Dynamics 365 ERP

Building line-of-business apps with Power Apps to digitize manual forms and workflows

Enterprise-grade RPA platform for large, complex, and highly regulated environments

Flexible RPA and automation platform for building, orchestrating, and scaling bots quickly

Cloud-native automation tightly integrated with Microsoft 365, Dynamics, and Azure services

Our automation philosophy: automation should augment people, not replace them

Significant reduction in operational costs as bots handle high-volume work 24/7

Automated processes follow defined rules every time, improving accuracy

Digital workers operate 24/7 with no downtime

Measurable impact within the first 90 days of go-live

Every step is logged, auditable, and aligned with regulations

Automations that support your people, not replace them

Transform your legacy systems into agile, cloud-native platforms and build a digital workforce with PYXON's expert guidance.

A culture of curiosity, ownership, and impact — where engineers, architects, and problem-solvers work on real AI, IoT, and cyber challenges across the MEA region.
